

### Overview

The NOTI•FIRE•NET™ Gateway is an intelligent gateway interface for the ONYXWorks® fire monitoring workstation. This gateway facilitates complete monitoring and control of a NOTI•FIRE•NET™ network. In addition, it supports full panel programming and network diagnostics.

The embedded gateway is a standalone version and is equipped with IP capability thus enabling ONYX® Series users to monitor multiple sites over an Ethernet network without the need for remote workstations.

### System Features

- Enables ONYX® Series workstation to monitor alarm, prealarm, trouble, disabled events, etc. for Notifier fire alarm control panels.
- Compatible with standard and high speed NOTI•FIRE•NET™ network.
- Adds acknowledge, silence, reset, enable/disable, and activate/deactivate control capability to the workstation.
- Supports fire alarm control panel programming upload/downloads and modifications.
- Embedded gateway allows remote IP connections and increases scalability of network.
- Supervised IP connections for remote workstations and gateways.
- Multiple workstations and FirstVisions can access the gateway at the same time.
- Gateway redundancy for network survivability.

### Typical applications

- University campuses
- High rise buildings
- School districts
- Hospitals
- Commercial office parks
