

### Overview

NOTI•FIRE•NET™ Web Server (NWS) gives authorized personnel the ability to view fire alarm network status from the office, home or on the road. Key facility maintenance and support personnel can be notified via email or text message in case of a trouble or emergency event.

### System Features

- View status and/or properties of devices on NOTI•FIRE•NET
- Built-in password security and user-access record
- Supports up to 64 operator and 64 administrator accounts
- Automatically send up to 50 emails or cell phone text messages in response to any system event

### Typical applications

- Hospitals
- Correctional facilities
- High rise buildings
- Manufacturing facilities
