

High-Speed Noti•Fire•Net

Network Systems

Network Systems

General

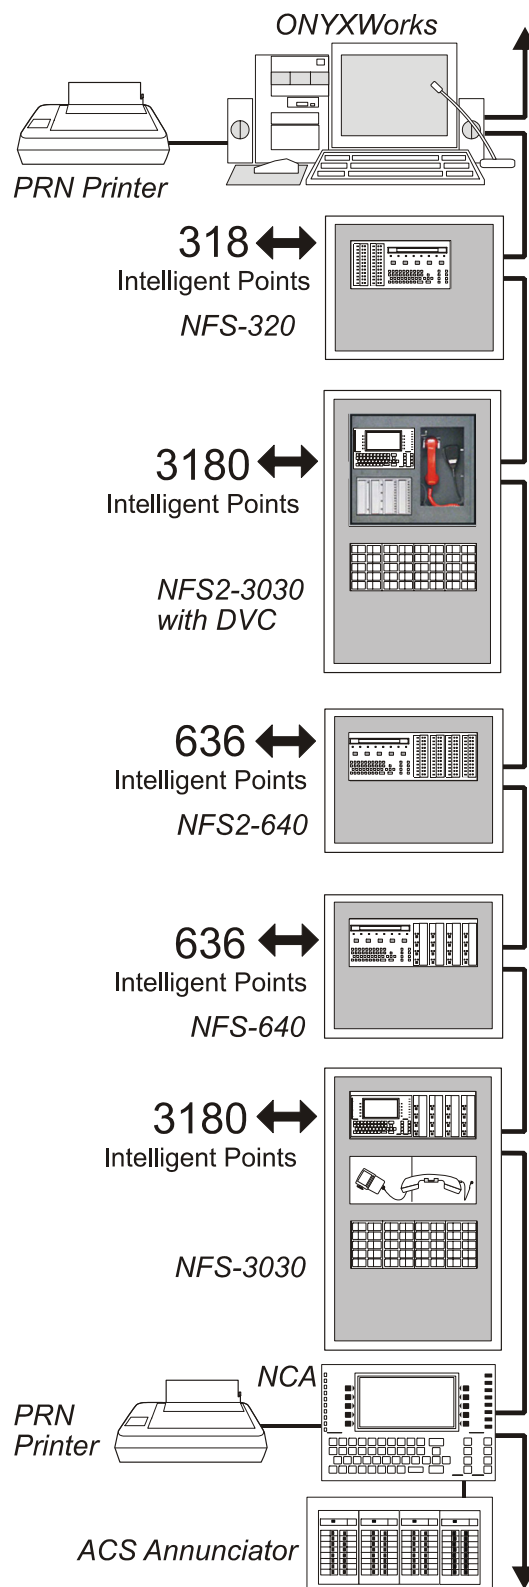

High-Speed NOTI•FIRE•NET (HS-NFN) is the interface which allows NOTIFIER Intelligent Fire Alarm Control Panels to form a network. Each local control panel (network node) maintains its own area of protection, while monitoring and controlling other areas (other network nodes). Allows for up to 200 node addresses.

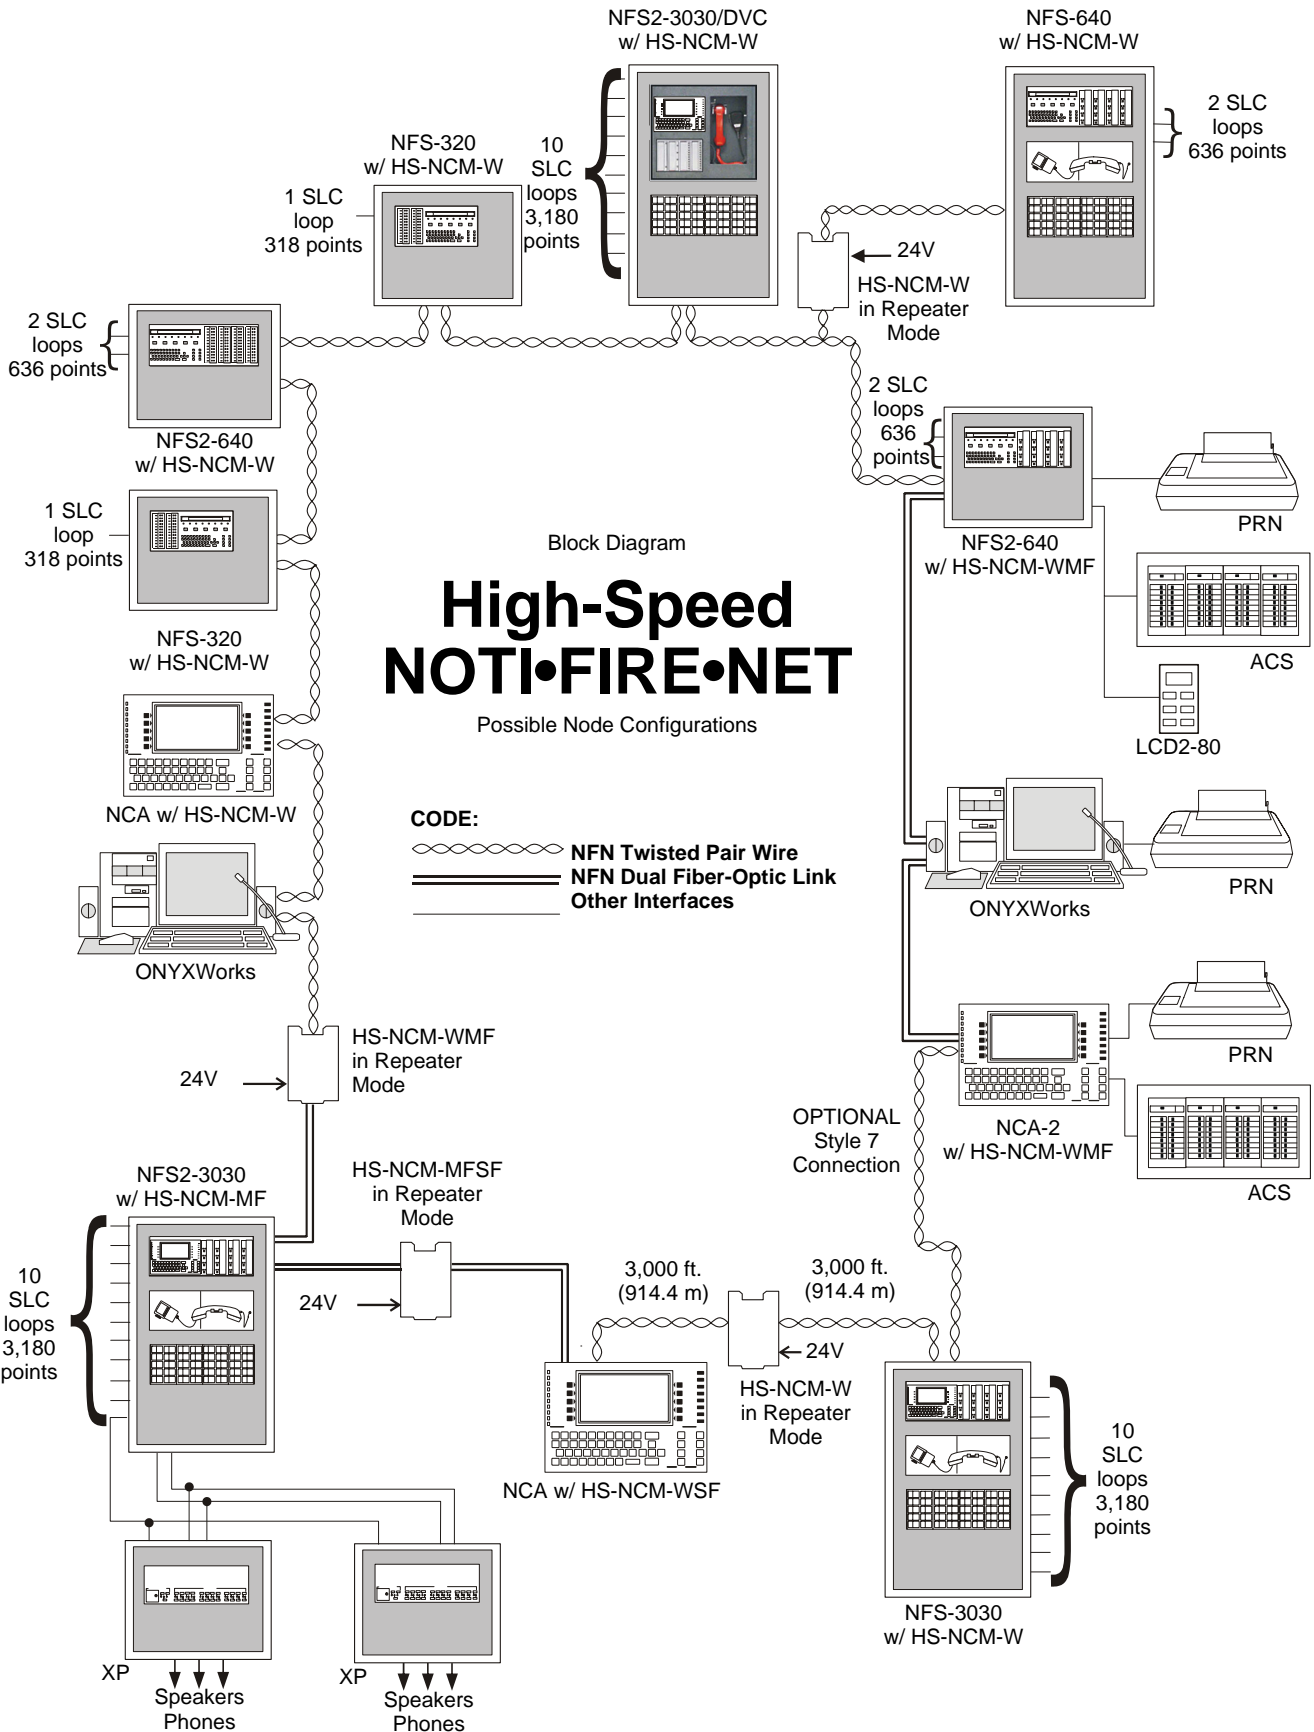

Local information is displayed at each network node. In areas such as a security office, where the entire network must be monitored, network annunciators are available.

NOTE: High-Speed Noti•Fire•Net is NOT compatible with Noti•Fire•Net.

Features

- Multi-mode fiber optic (MF), single-mode fiber optic (SF), wire (W), or a combination of W/MF/SF communications path.
- NFPA Style 4 or Style 7 network operation.
- True peer-to-peer communications. Each node stores its own program and communicates equally with all other nodes.
- No "master" polling computer or other central weak link.
- Inherently regenerative system. Each node acts as a repeater to reshape and regenerate data signals. Failure of any node does not affect any other node/communications among surviving nodes.
- High-speed data communications (12 Mb wire, 100 Mb MF/SF fiber) operates several times as fast as competitive networks.
- Simple plug-in module. The HS-NCM connects the NFS2-3030, NFS-3030, NFS2-640, NFS-640, NFS-320, NCA-2, NCA, DVC, ONYXWorks, BACnet Gateway, and NWS.
- Multiple ONYXWorks® may be placed anywhere on the network. Additional ONYXWorks may be used to provide inherent "hot" backup.
- Multiple Network Control Annunciators (NCA/NCA-2) may be placed anywhere on the network.
- ONYXWorks, NCA and NCA-2 display all network activity. Unlike competitive systems, the point display capacity is NOT held to less than the maximum network capacity.
- Single small-gauge (18 AWG to 14 AWG) twisted-pair wire (no shield necessary) for data communications path.
- Electrical isolation between nodes.
- Network clock synchronization (see page 3).
- History Buffers on NCA-2, NCA, ONYXWorks, NFS2-3030, NFS-3030, NFS2-640, NFS-640, and NFS-320 Intelligent Fire Control Panels.
- Powerful Cooperative-Control-by-Event allows point(s) on one node to activate point(s) on other nodes. Any input can turn on any output, network-wide.

ONYXWorks Workstation

The ONYXWorks Workstation is based on a UL 864-recognized computer. Special hardware and software are added by NOTIFIER to make the ONYXWorks Workstation operate as a Command Center for High-Speed Noti•Fire•Net™.

PENTIUM-BASED COMPUTER (ONYXWorks) features:

- Intel® 2.0 GHz Pentium® IV microprocessor.
- 256 KB cache memory, 1GB RAM.
- 80 GB hard drive, 1.44 MB floppy drive, 24/10/40X CD-RW drive.
- 19" flat-screen LCD monitor, keyboard, P/S 2 mouse,
- 300 Watt power supply, sound card, microphone, and internal speakers.
- Microsoft® Windows® XP.

NCA/NCA-2 Network Control Annunciator

The NCA and NCA-2 provide full annunciation of all network alarm signals and may optionally allow system control functions.

- 640-character, backlit LCD display shows all network alarms and troubles.
- LEDs for POWER, FIRE ALARM, PRE-ALARM, SECURITY, SUPERVISORY, SYSTEM TROUBLE, OTHER EVENT, SIGNAL SILENCED, POINT DISABLE, and CPU FAILURE.
- Fixed Function Keys/Switches for FIRE ALARM SCROLL/DISPLAY, SECURITY SCROLL/DISPLAY, SUPERVISORY SCROLL/DISPLAY, TROUBLE SCROLL/DISPLAY, OTHER EVENT SCROLL/DISPLAY, SIGNAL SILENCE, DRILL, AND SYSTEM RESET.
- Special Function Keys for DISABLE/ENABLE, PRINT SCREEN, LAMP TEST, NEXT SELECTION/PREVIOUS SELECTION, and RECALL LAST ENTRY.
- Alphanumeric QWERTY keypad with tactile and audible feedback.
- Nonvolatile real-time clock can be synchronized with network by master node.
- Nonvolatile History Buffer (200 Alarm events, 1,000 System events).
- Two optically-isolated EIA-232 ports for printer and CRT terminal.
- Mounts in ABS-4D surface/semi-flush cabinet with door and key lock.
- Mounts in CAB-3 or CAB-4 Series cabinets, using ADP-4(B) hinged dress panel.
- An HS-NCM is required for every NCA/NCA-2.
- 24 VDC power from remote or local supply (CAB-3/4 Series cabinet required for local power).

NCA/NCA-2

Associated Specifications

- ONYXWorks® Workstation
See ONYXWorks® data sheet, DN-7048.
- NCA Network Control Annunciator
See NCA data sheet, DN-6858.
- NCA-2 ONYX Network Control Annunciator
See NCA-2 data sheet, DN-7047
- HS-NCM-W/MF/SF/WMF/WSF/MFSF Network Communications Module
See High-Speed Network Communications Modules data sheet, DN-60454.

Compatible panels: NFS-320, NFS-640, NFS2-640, NFS-3030, NFS2-3030.
- BACnet Gateway
See BACnet Gateway data sheet, DN-6877.
- NWS NOTI•FIRE•NET™ Web Server
See NWS data sheet, DN-6928.
- NFN-GW-EM, DN-7060
- DVC, DN-7045

Agency Listings and Approvals

All Noti•Fire•Net™ equipment, including the ONYXWorks, NCA/NCA-2 are listed by Underwriters Laboratories in file S635. Listings are for UL category UOJZ (Control Units System) and comply with UL standard 864 (control units for Fire-Protective Signaling Systems) and comply with UL 1076 (Proprietary Burglar alarm units and systems) UL 1610.

Certain software features described in this catalog sheet may not yet be included in this UL listing. Consult factory for latest listing status.

Listings for many other agencies are in process. Consult factory for latest listing status.

Engineer/Architect Specifications

Complete specifications on NOTI•FIRE•NET™ and NOTIFIER's complete line of fire alarm control and peripheral devices are available from NOTIFIER.
