

UniNet[®] Online

Monitor Your Fire
and Security
Network Like Never
Before

MULTIVENDOR CAPABILITY

In the past you've been restricted to monitoring only the proprietary devices on your network. With NOTIFIER's UniNet Online you now have the freedom to view and monitor all of your network devices regardless of their make or brand. UniNet Online meets UL- and ULC-listed requirements and provides remote read status of all the NOTIFIER fire panels on your UniNet[®] 2000 network. UniNet Online can also provide event information for a range of fire alarm control panels, security panels, and other systems from multiple vendors.

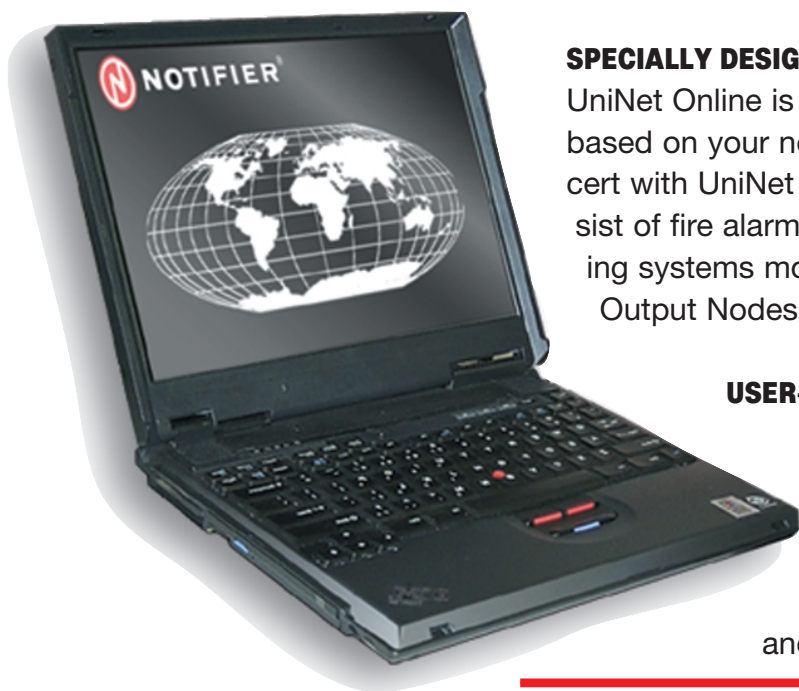

UniNet Online is a web-based application that operates with the UniNet 2000 network through your browser's Internet, Intranet, or dial-up connection. Now you can stay in touch with your facility through your PC or Laptop computer. Whether you're at home, on the road, or at another location at your facility, UniNet Online can keep you abreast of your network's status anytime, anywhere.

SPECIALLY DESIGNED FOR YOUR NETWORK

UniNet Online is designed to work in your environment based on your network's configuration. It operates in concert with UniNet Local and Wide Area Networks that consist of fire alarm devices, security devices, and other building systems monitored with NOTIFIER Network Input Output Nodes (NIONs).

USER-FRIENDLY MENU-BASED INTERFACE

With its user-friendly menu-based interface, UniNet Online gives operators easy viewing of event history and fire alarm panel devices. It can even display systems status, NOTIFIER device properties and other vital information.

UniNet® Online Architecture

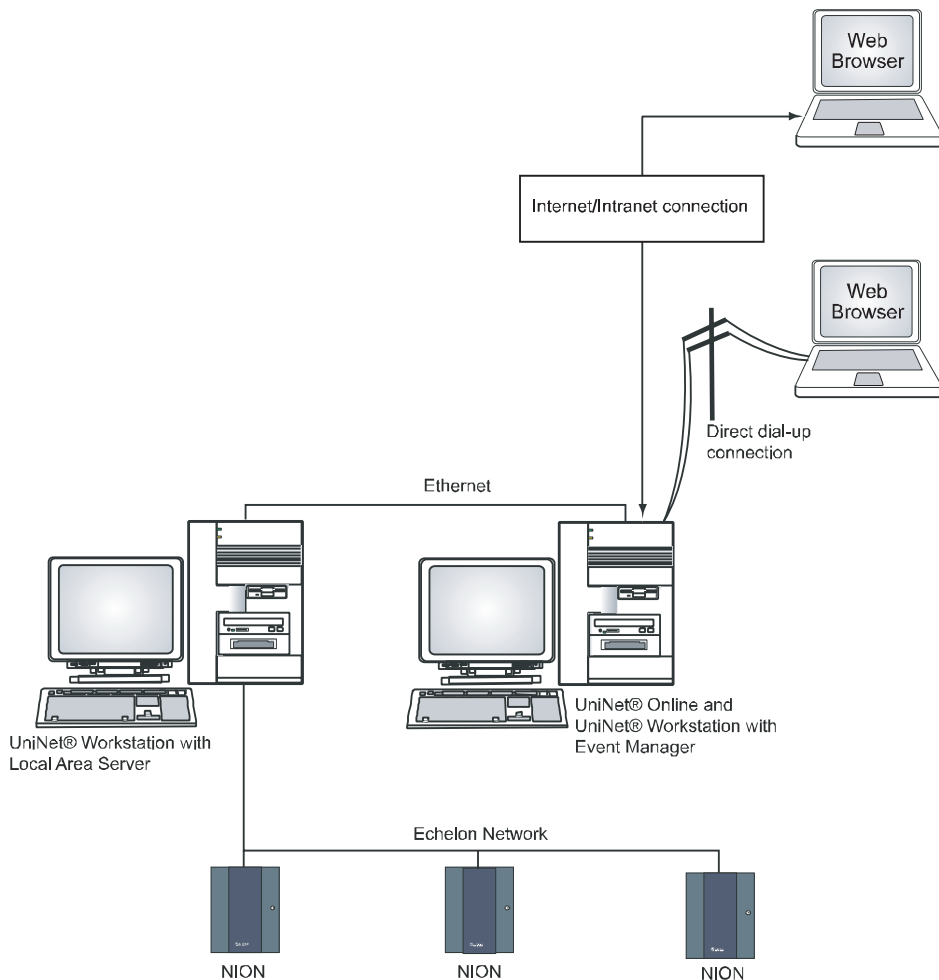

SAFE AND SECURE

UniNet Online's Security Profiles prohibit unauthorized access to the UniNet 2000 network. Additional security features provide your Systems Administrator with the ability to define and maintain these profiles as well as determine which users can have access to UniNet Online.

SERVICE AND SUPPORT

NOTIFIER products and services are offered through an extensive array of authorized Engineered Systems Distributors. These distributors are ready to assist you in the design installation, commissioning and management of your UniNet Online and UniNet 2000 network system.

To learn more about UniNet Online, UniNet 2000 or other NOTIFIER products call (203) 484-7161 and ask for the distributor nearest you. Or visit us at www.notifier.com.
